DESCRIPTION

NIGHT is a supplement based on L-Arginine, L-Citrulline, Taurine, Vitamin C, Vitamin E, Diosmin and Folic Acid, useful for providing an additional amount of these nutrients in the presence of food deficiencies or increased needs.

Nitric Oxide is produced from Arginine; Citrulline is a precursor of the latter, and together with Taurine they promote the production of Nitric Oxide (NO).

Folic acid is important for the synthesis of methionine which is produced starting from homocysteine, the accumulation of which can be harmful to the cardiovascular system.

NIGHT with vitamins C and E, as well as promoting an antioxidant action, can help keep the cardiovascular system and all tissues healthy.

It can therefore also be useful and recommended for athletes by promoting the flow of blood to the muscles and promoting an antioxidant action.
